Jamie Oliver, the easy-going ambassador of Brit food, has put his fame to work: he's opened the hit London restaurant Fifteen, which was named for its staff, 15 formerly untrained jobless youngsters he transformed into chefs in six short months; *Jamie's Kitchen*, a documentary on the restaurant, began airing in November on the Food Network, coinciding with the release of the cookbook by the same name; and he's introduced a new line of cookware by T-Fal, and his knives of choice by MAC Knife.
